- Secure Internet access
- IBM System i (AS/400) configured
- Hardware and software maintenance
- Streamlined implementation
- Application support and training

Powerful Tools and Versatility with JDA MMS SaaS

Merchandising is the core of the SaaS enterprise solution. RPE provides the powerful tools and functionality of the industry's leading merchandise management system at a fraction of the cost.

JDA MMS is the same system with the same capabilities and tools used by the largest retailers in business today. Through SaaS, retailers have easy access to all the meaningful tools needed to succeed including planning, buying, warehouse, replenishment, sales analysis and financial control.

- Comprehensive Merchandising and Inventory Management
- Successful Planning and Analysis
- Accurate and Flexible Price and Cost Management
- Data Integrity

Why RPE and JDA?

For retailers that need a comprehensive merchandising system, but are hesitant to invest in the traditional model of licensing fees, SaaS by JDA and RPE is the answer. There are no unknown costs and no long term commitment to staff, hardware and application software licenses.

Together RPE and JDA have built a powerful solution for retailers of all sizes. For small and growing retailers, we offer access to technology that most companies could not otherwise afford.

Larger retailers can benefit by eliminating the headaches and investment of running IT operations while keeping up with the demand of new technology.

- **Low initial investment** - The highly affordable cost of implementing and using this system is surprising low and provides retailers access to a merchandising solution used by large retailers at a fraction of the cost.
- **Highly scalable, ability to grow** - As your business grows, the ability to add new stores, warehouses and offices to the system is simple. From 1 to 1,000 stores, the SaaS solution grows with you.
- **Known cost** - With a known fixed monthly fee per store, there are no surprises. Prevent suffering from typical IT cost overruns and preserve valuable capital dollars for business priorities.
- **Flexibility** - The business environment is constantly changing, and the ability to upscale or downscale within certain parameters can help mitigate the risk of committing to a new system.
- **No IT staff, software licensing or hardware costs** - By using SaaS, you eliminate the cost of a dedicated IT staff to manage the system and expensive hardware and software purchase.
- **Guaranteed 24/7/365 service** - Avoid the headaches of troubleshooting, technical support and downtime. Updates are automatically installed guaranteeing the system is running 100% of the time.
