Integrating people, process and IT.

JDA Reporting for MMS and JDA Business Analysis for PMM

Business Intelligence for Informed Decision Making

Transform your business to make well-informed decisions based on accurate and real-time information gathered from your entire business network. Gain a competitive edge with these agile and intuitive analytics solutions. With tightening budgets and reduced resources, Business Intelligence (BI) empowers business to solve individual and company-wide challenges with confidence.

## Optimize the Decision-Making Process

JDA Reporting for MMS and JDA Business Analysis for PMM provide the capabilities to effectively manage the complexities of your organization through real-time and historical views of critical data. These comprehensive solutions deliver timely reporting capabilities to improve the effectiveness of daily decision making. Enhance how you engage with colleagues to deliver mission-critical insights across the entire enterprise. Confidently and quickly take actions to improve the business through analytics and BI.

Enhance Operational Efficiencies

Real-time visibility improves operational efficiency, from cost controls to customer service. JDA Reporting and JDA Business Analysis provide the insights needed to continuously improve performance. Up-to-the-minute information is accessible to decision makers quickly and accurately along with detailed insight to assist with addressing the most pressing operational issues.

Drive Business Intelligence from JDA MMS and PMM

JDA Reporting and JDA Business Analysis bring together data from other applications resulting in complete reporting coverage. These tools are pre-integrated into JDA's solutions, allowing for real-time access to the data they generate. Based on IBM Cognos 11, these analytics tools are easily supportable within the MMS and PMM platforms. These solutions have many advantages over JDA's legacy reporting tool and users will quickly see the improvements.

Increase productivity with customized reports from anywhere at anytime.

Key Benefits

- Real-time access to data so there is no need to wait for batch data
- Capabilities to combine data sources
- Consistent web-based experience accessible via web browser or mobile
- Access whenever and wherever
- Interactive way for anyone to find, explore and share data-driven insights
- Find precise and timely answers from captured data
- Create compelling reports and dashboards
- Easily distribute reports throughout the company in multiple formats
