

## Merchandise Management Solutions Delivered on the Cloud

### Achieve Profit with Optimal Inventory and Service Levels

Achieving peak performance requires a merchandising solution that adapts to evolving consumer demands, leverages growth opportunities and helps retailers stay connected to core customers. Based on more than 25 years of merchandising best practices, retailers worldwide rely on JDA software solutions to drive sales, margins and cash flow by getting the right products to the right place at the right time.

As a JDA Software Business Partner, RPE has been implementing, hosting and managing JDA software solutions since 1999. Implementing JDA merchandising software solutions on the RPE cloud is a proven, cost-effective and integrated platform that adapts to change across sales channels, provides visibility into inventory position and empowers teams to act fast on market shifts and corporate initiatives. From tracking inventory across multiple channels to managing vendor relationships, sales and trends, you can leverage intelligent analysis capabilities right from your laptop at anytime from anywhere.

**Access data via web browser or mobile whenever and wherever to increase productivity.**

### Improve Performance and Reduce Costs with Cloud-Based Solutions

Keep pace with ever-changing business needs by deploying your JDA software solutions in the RPE cloud. Running your solutions in the cloud increases your speed and agility so that you're operating at peak performance. It also reduces your total cost of ownership – freeing up your workforce and budgets to focus on core, strategic initiatives.

By deploying in the cloud, you'll achieve faster ROI compared to traditional, on-premise deployments and upgrades. You'll reduce in-house labor costs, plus the hidden costs of hiring, training and attrition. JDA solutions help you maintain the lowest inventory investment while still sustaining service levels by aligning product supply with consumer demand to increase sales, margins and satisfaction. Plus, you'll always have the RPE cloud experts on hand to make sure your applications are running at optimal performance.

### Grow with IBM Power Servers

Authorized Systems and Storage

Power Systems

All RPE hosting is supported by IBM Power Systems for delivery of large amounts of data across many devices and channels. Optimized for exceptional business resilience and non-disruptive growth, IBM Power Servers are built on advanced POWER9 technology innovatively designed to drive faster and more efficient data-centric applications. RPE is an IBM Silver Business Partner

and our team is vigorously tested and evaluated on hardware and software to help you choose the right solutions for your specific needs and challenges.

### Comprehensive Functionality

- Reporting/Analytics
- Inventory Control
- Purchase Order Management
- Item Management
- Price & Cost Management
- Replenishment
- General Ledger
- Accounts Payable
- Warehouse Management

### Proven Benefits

- Robust capabilities
- Complete and integrated solution
- Flexible configuration
- Reliability and accuracy
- Affordable implementation
- Cost efficiencies
- Data access anytime from anywhere
- Scalable for growth
- Meet regulatory compliance
- Improve security

# Merchandise Management Solutions Delivered on the Cloud

## Capabilities and Benefits of JDA Solutions

### Reporting/Analytics

- View data in real time with no need to wait for batch data
- Consolidate information from multiple systems to quickly and easily check business status
- Access whenever and wherever for precise and timely answers to improve decision making

### Inventory Control

- Maintain the lowest inventory investment while sustaining service levels by aligning supply with consumer demand
- Minimize inventory distortion based on customer buying behavior analysis
- Manage inventory by case quantity, inner packs, inventory units, sell units and weight

### Purchase Order Management

- Manage rebates and allowances accurately and efficiently
- Increase productivity with bulk POs and multi-drop POs with multi-currency support
- Improve PO management with landed cost and support prepack and pre-distributed POs

### Item Management

- Maintain a profitable product mix with system that supports styles and SKUs
- Increase efficiencies allowing for multiple vendors per item
- Optimize inventory with fractional quantities to deliver unmatched speed and service

### Price & Cost Management

- Increase revenue and margins with comparative pricing, reduced return rates and fewer repricing events
- Support a variety of pricing strategies across channels
- Determine the best price for each product across every channel and in every store

### Replenishment

- Reduce inventory and increase turns through optimizing safety stock, creating optimal order quantities and integrating promotion buying
- Recover lost sales and reduce lead time with more accurate forecasts, driving service levels and lead-time forecasting
- Analyze and track inventory status and buyer performance

### General Ledger

- Support specific needs and requirements with a system designed for flexibility
- Upload journal entries from spread sheets with ease and accuracy
- Reopen a closed period

### Accounts Payable

- Deliver improved matching capabilities
- Expedite processing using multiple term codes per vendor
- Prepare reports quickly and accurately

### Warehouse Management

- Maximize the DC's value to produce the greatest return by bolstering omnichannel fulfillment strategies
- Plan, manage and track merchandise storage and flow across warehouses and DCs for improved operations
- Meet omnichannel commitments with inventory movement between each channel

**Understand and address performance levels across all operations including forecasting, inventory, fulfillment and transportation.**

**Improve inventory and sales performance with insight from across the entire enterprise.**

## Services, Solutions, Results

RPE is a leading retail consultant specializing in merchandising and supply chain solutions. In partnership with JDA and IBM, we recommend and implement cloud-based solutions to help retailers transform how you do business.
